Simple OpenNI Library:

For Windows:

- Download SimpleOpenNI

- Copy the 'SimpleOpenNI.zip' into this folder:

      C:\Users\'your username'\Documents\Processing\libraries

- If you don't have this folder then create it.

- If you use the **64bit** version, verify if you run Processing with 64bit. Mainly you have to install a 64bit Java version, also you have to remove the Java folder in the Processing folder.

For Mac OSX:

- Download the Installer

- Unzip the file and open a terminal window

- Open the unzipped folder 'OpenNI_NITE_Installer-OSX' in terminal
```
> cd ./OpenNI_NITE_Installer-OSX
```

- Start the installer
```
> sudo ./install.sh
```
